

MARY LANGLEY

Technical Writer

Merrittstown, PA | (814) 482-1178 | vampgirl69101@gmail.com | linkedin.com/in/mary-langley-998b84130 | github.com/vampgirl69101/Technical-Writer-Projects

PROFESSIONAL SUMMARY

Technical Writer with 4+ years of experience producing accurate, structured documentation for complex technical publications. Experienced in documentation architecture, structured authoring, content management, and documentation automation using Python and XML, with a track record of ensuring consistency, accuracy, and version control across a 1,443-page technical publication. Skilled in translating complex information into clear, maintainable documentation, procedures, and reference material designed for usability, navigation, and reader comprehension. Conducts thorough technical research and fact verification, and collaborates cross-functionally to confirm accuracy before publication. Adept at applying style guide standards and AI-assisted writing tools (Claude, ChatGPT, GitHub Copilot) to improve documentation efficiency in both independent publishing and software development environments.

CORE COMPETENCIES

Technical Writing & Editing: Technical Writing, Python, Copyediting, Proofreading, Content Development, Content Strategy, Style Guide Adherence, Technical Research, Content Verification, Quality Assurance

Documentation & Publishing: Documentation Architecture, Information Architecture, Structured Authoring, Procedures & Work Instructions, Documentation Automation, Long-Form Publication Workflows, Table of Contents & Index Generation, Cross-Referencing, Print & Digital Publishing

Tools & Technologies: Python, XML, Markdown, Microsoft Word, Excel, Git/Version Control Concepts, AI-Assisted Writing Tools (Claude, ChatGPT, GitHub Copilot), Bootstrap

Project & Process Management: Project Management, Change Management, Workflow Optimization, Agile Methodologies, Smartsheet, Salesforce, Requirements Gathering, Cross-Functional Collaboration

Design & Visual Communication: Adobe InDesign, Photoshop, Illustrator, After Effects, Dreamweaver, Publisher, UI Design, Visual Documentation

FEATURED TECHNICAL DOCUMENTATION PROJECT

The Ebionite Bible — 1,443-Page Reference Publication

Independent Technical Documentation Project

- Authored and produced a 1,443-page technical reference document containing over 100 maps, genealogical charts, glossary entries, concordance entries, and index pages, demonstrating large-scale documentation development and information architecture.
- Designed and built a custom five-step Python/XML documentation automation pipeline to achieve precise structural and typographic control at scale, improving accuracy and reducing manual formatting errors across the full document set.
- Compiled an extended reference apparatus with a scholarly focus on Ebionite Christology, applying technical research and content organization standards to improve usability, navigation, and reader comprehension for end users.
- Engineered a verified, static table of contents using a two-pass text-extraction and validation method, ensuring 100% structural accuracy across all 1,443 pages.

Technologies: Python, XML, Microsoft Word

Portfolio: Equipment guides, API documentation, and software user manuals available on GitHub (github.com/vampgirl69101/Technical-Writer-Projects), including:

- GE Vernova gas turbine and g3 circuit breaker documentation
- HPE Aruba CX switch and ProLiant server guides
- REST API guide (ITAM) and software user manuals (Jira, Salesforce, MadCap Flare)

PROFESSIONAL EXPERIENCE

Independent Author & Publisher

January 2024 - Present

Self-Publishing / Sole Proprietor — Kindle Direct Publishing (KDP), Merrittstown, PA

- Research, write, and edit long-form technical documentation and reference procedures, applying rigorous documentation planning, technical formatting, and style guide standards throughout the content lifecycle.
- Manage full-cycle documentation workflows for projects spanning hundreds to over a thousand pages, from content planning and structured authoring through technical editing and final production.
- Verify structural integrity, typographic precision, and content accuracy for long-form print and digital deliverables, maintaining consistency and quality for end users and a global readership.
- Develop automated Python and XML documentation pipelines to streamline document assembly, enforce formatting standards, and ensure precision across complex, multi-part technical documents.

Technical Writer & Design Lead

January 2020 - Present

Indie Game Design and Development, Merrittstown, PA

- Write and maintain technical specifications, procedures, and design documentation, serving as technical lead to align project requirements with software capabilities and gathering information through research and cross-functional collaboration.
- Document complex logic, mechanics, and asset architectures in Unreal and Unity engines to support development, onboarding, and end-user comprehension.
- Perform testing and error verification, documenting resolution pathways and standard procedures to support change management and improve product stability.
- Apply DevOps practices and AI-assisted tools (Claude, ChatGPT, GitHub Copilot) to improve documentation accuracy, content efficiency, and technical writing workflows.

EDUCATION

Game Design Professional Certificate (Coursework)

January 2024

Epic Games

Business Administration and Management (Coursework)

January 2005

American InterContinental University Online, Atlanta, GA

Coursework

Free Code Camp

CERTIFICATIONS

- Project Management Essentials — Howard University (January 2024)
- Introduction to Game Design Certificate — Epic Games (January 2024)
- Unreal Engine Fundamentals Certificate — Epic Games (January 2024)
- Blueprint Scripting Certificate — Epic Games (January 2024)
