1. Purpose and Scope

This guide explains how to use WalkMe, an in-application guidance layer many organizations add to their web applications. It covers the WalkMe elements you may encounter as an end user — the widget, the WalkMe Menu, Smart Walk-Thrus, SmartTips, and ShoutOuts — and how to use each one.

This guide is written to be host-application agnostic: it does not describe any single product, because WalkMe is deployed inside many different applications by many different organizations. Screens shown throughout use a generic placeholder application to illustrate where WalkMe elements typically appear.

This guide is a portfolio writing sample based on publicly available WalkMe product documentation. It is not official WalkMe, Inc. documentation.

1.1 Audience

This guide is written for end users who are new to working in a WalkMe-enabled application, including new hires completing onboarding and existing users who want a refresher on the available self-service guidance.

1.2 Related Documents

- Your organization's WalkMe Administrator Guide (segment and content configuration)
- Your organization's IT Help Desk contact information
- Application-specific user guides for the system WalkMe is deployed in

2. What Is WalkMe?

WalkMe is a digital adoption platform layered on top of a host application. It does not change how the underlying application works; instead, it adds guided overlays, tooltips, and a self-service menu directly on the screen so you can complete tasks correctly the first time, without leaving the page to search for instructions.

Throughout this guide, WalkMe elements are shown in orange to distinguish them from the host application underneath.

2.1 WalkMe Element Glossary

Element	Description
Widget / Launcher	A button placed on the page — often a small icon in a corner — that opens the WalkMe Menu or starts a specific piece of guidance, such as a Smart Walk-Thru or Resource.
Smart Walk-Thru	Step-by-step, on-screen guidance that walks you through a task using balloons connected to the relevant buttons and fields. Steps can continue across multiple pages.
SmartTip	A single tooltip attached to one field or button, used to explain what to enter or to validate what you typed before you submit a form.
ShoutOut	A banner or pop-up announcement used for time-sensitive updates, such as a new feature or a maintenance notice. It can include a button that launches other guidance.
WalkMe Menu	A side panel that gives you self-service access to Resources, Smart Walk-Thrus, and Onboarding Tasks for the page you're on. Organized into a Help tab and a Tasks tab.

Resource	An article or video that has already been created outside WalkMe (such as a help center page) and linked into the WalkMe Menu for quick access.
Onboarding Task	A Smart Walk-Thru or Resource that has been given a specific goal and added to the Tasks tab of the WalkMe Menu, typically used for structured training.
Shuttle	A guided transition that takes you directly to another page or section of the application, often used as one step within a larger Smart Walk-Thru.
Survey	A short, targeted question WalkMe displays in-app to collect feedback, often shown at the end of a Smart Walk-Thru.

3. Getting Started

WalkMe loads automatically inside any application it has been deployed in. No separate login or installation is required — if your organization has enabled WalkMe for an application, it will appear as soon as you open that application.

3.1 Locating the WalkMe Widget

The WalkMe widget is a small icon — commonly placed in a corner of the screen — that gives you access to guidance. Selecting it opens the WalkMe Menu, which lists everything available for the page you're currently viewing.

Figure 1. A host application with the WalkMe widget docked in the lower-right corner.

NOTE

The exact position and appearance of the widget is configured by your organization's WalkMe administrator and may differ from what's shown here.

4. Using the WalkMe Menu

The WalkMe Menu is a self-service panel that gives you on-demand access to Resources, Smart Walk-Thrus, and Onboarding Tasks without needing to search elsewhere for help.

4.1 Opening the WalkMe Menu

1. Select the WalkMe widget from any page.
2. The menu opens with two tabs: Help, for guides and Resources you can access anytime, and Tasks, for structured Onboarding Tasks with a specific goal.
3. Select any item to open it in place — a Resource opens immediately, and a Smart Walk-Thru or Onboarding Task begins guiding you through the page.

Figure 2. The WalkMe Menu, open to the Help tab.

TIP

If you can't find what you're looking for, use the search field at the top of the menu — most WalkMe Menu configurations let you search across all available content.

5. Following a Smart Walk-Thru

A Smart Walk-Thru gives you step-by-step, on-screen guidance for completing a task. It uses balloons connected to the relevant buttons and fields, and can continue across multiple pages to support a complete, end-to-end process.

5.1 Step-by-Step Procedure

1. Start a Smart Walk-Thru from a Launcher on the page, from the WalkMe Menu, or from a ShoutOut — the available starting points depend on how it was built.
2. Follow each balloon as it appears. Most Smart Walk-Thrus highlight the exact field or button to interact with next and advance automatically once you complete that step.

Figure 3. A Smart Walk-Thru step highlighting a required field.

NOTE

You can exit a Smart Walk-Thru at any time by selecting the “X” on the balloon. Depending on how it was built, you may be able to resume later or need to restart from the beginning.

3. Complete the remaining steps as prompted. Some Smart Walk-Thrus end with a short Survey asking for feedback on the experience.

6. SmartTips and ShoutOuts

SmartTips and ShoutOuts are two lighter-weight forms of guidance you may see outside of a full Smart Walk-Thru.

6.1 SmartTips

A SmartTip is a single tooltip attached to one field or button. It's commonly used to explain what to enter, or to give you real-time feedback if what you entered doesn't pass validation.

Figure 4. A SmartTip providing guidance on a form field.

6.2 ShoutOuts

A ShoutOut is a banner or pop-up announcement used for time-sensitive updates, such as a new feature or a maintenance notice. It appears automatically when you load an affected page and can be dismissed by selecting the close icon.

Figure 5. A ShoutOut announcing a new feature on the home screen.

NOTE

Dismissing a ShoutOut does not permanently hide it for other users — it will still appear for colleagues who have not yet seen it.

7. Troubleshooting and FAQ

If WalkMe guidance does not behave as expected, review the items below before contacting support.

Question	Answer
A Smart Walk-Thru didn't start when I clicked Launch.	Refresh the page and confirm pop-up blockers are disabled for your application, then try again from the widget or WalkMe Menu.
I don't see the WalkMe widget anywhere.	The widget can be hidden by an administrator on certain pages, or disabled from your Preferences if your organization allows it. Check the Settings page or contact your WalkMe administrator.
Can I exit a Smart Walk-Thru and come back later?	Yes. Select the "X" to exit at any time. Depending on how the Smart Walk-Thru was built, you may be able to resume from where you left off or restart it from the WalkMe Menu.
Why does a SmartTip keep appearing on the same field?	SmartTips are often set to reappear until the field passes validation. Review the guidance in the tip and correct the entry it's pointing to.
Who do I contact if guidance seems out of date?	Use Contact Support in the WalkMe Menu, or reach out to your organization's Digital Adoption Training Team.

Appendix A: New User Onboarding Checklist

Use this checklist during onboarding to confirm a new user is comfortable with WalkMe guidance.

	New User WalkMe Onboarding Checklist
☐	Locate the WalkMe widget on your application's home screen
☐	Open the WalkMe Menu and review the Help and Tasks tabs
☐	Complete an available Smart Walk-Thru from start to finish
☐	Respond to a SmartTip on a form you use regularly
☐	Bookmark the Contact Support resource in the WalkMe Menu
