1. Purpose and Scope

This guide explains how to use SmartCare™ with the help of WalkMe, the in-application guidance tool built into the platform. It covers the WalkMe elements available to clinical staff, and walks through two of the most common tasks in the system: completing a new client intake and documenting a progress note.

This guide is a portfolio writing sample based on publicly available information about SmartCare™, a behavioral health EHR developed by Streamline Healthcare Solutions. The screens shown throughout are illustrative mockups created to demonstrate a WalkMe-enabled end-user manual in a Fortune 500-style documentation format — they are not actual SmartCare product screens, and this is not official Streamline Healthcare Solutions documentation.

1.1 Audience

This guide is written for clinical and care coordination staff who use SmartCare™ to manage a caseload, including new hires completing onboarding and existing staff who want a refresher on available self-service tools.

2. What Is WalkMe?

WalkMe is a digital adoption platform layered on top of SmartCare™. It does not change how the underlying EHR works; instead, it adds guided overlays, tooltips, and a self-service help panel directly on the screen so clinicians can complete required documentation correctly the first time, without leaving the chart to search for instructions.

Throughout this guide, WalkMe overlay elements are shown in orange to distinguish them from the SmartCare™ application underneath.

2.1 WalkMe Element Glossary

Element	Description
Launcher	The orange “?” icon docked in the corner of the screen. Opens the WalkMe menu of available guidance on the current page.
Smart Walk-Thru	A guided, step-by-step overlay that walks a user through a task in the live application, one field or click at a time.
ShoutOut	A banner or pop-up announcement used to communicate time-sensitive information, such as a policy change, directly inside the application.
Smart Tip	A single-step tooltip that highlights one field or button, typically used for a short reminder rather than a multi-step process.
Resource Center	A side panel that gives users self-service access to all available guides, FAQs, and support contacts for the current page.

Survey	A short, targeted question WalkMe displays in-app to collect user feedback (not covered in this guide).
--------	---

3. Getting Started

WalkMe loads automatically when you sign in to SmartCare™. No separate login or installation is required.

3.1 Locating the WalkMe Launcher

The Launcher is the orange “?” icon docked in the lower-right corner of every main screen. Selecting it opens a menu of guidance available for the page you are currently viewing, including Smart Walk-Thrus, FAQs, and support contacts.

Figure 1. The Dashboard, with the WalkMe Launcher docked in the lower-right corner.

NOTE

If the Launcher is not visible, confirm you are on a supported page. It is always available from the Dashboard.

4. Completing a New Client Intake

This section walks through registering a new client using the SmartCare™ Smart Walk-Thru. The Walk-Thru highlights one field at a time and advances automatically as you complete each step.

4.1 Step-by-Step Procedure

1. From the Clients tab, select the WalkMe Launcher and choose “Walk-Thru: First Client Intake,” or select New Client Intake directly to begin.

Figure 2. Smart Walk-Thru, Step 1 of 4 — starting a new client intake.

2. Enter the client's legal name and date of birth as prompted.
3. When you reach the Program / Level of Care field, WalkMe highlights it and displays guidance for selecting the correct value.

The screenshot shows a web browser window with the URL <https://app.smartcare-streamline.com/clients/intake>. The page has a dark green header with the SmartCare™ logo and navigation links: Dashboard, Clients (highlighted), Scheduling, Documentation, and Reports. A user profile icon 'JT' is in the top right. The main content area is titled 'New Client Intake' and contains four input fields: 'Client Legal Name', 'Date of Birth', 'Program / Level of Care', and 'Referral Source'. The 'Program / Level of Care' field is highlighted with an orange border. A WalkMe overlay box is positioned to the right of this field. The overlay has a title 'WalkMe' and a sub-header 'Select the Program'. The text inside the overlay reads: 'Choose the program or level of care matching the client's referral. This determines which clinical templates and consent forms appear later.' At the bottom of the overlay, it says 'Step 2 of 4' and has a 'Next >' button.

Figure 3. Smart Walk-Thru, Step 2 of 4 — selecting a program.

CAUTION

Selecting the wrong program can attach the wrong clinical templates and consent forms to the chart. If you are unsure which one applies, confirm with your intake coordinator before continuing.

4. Continue through the remaining Walk-Thru steps to record the referral source and required consents.
5. Select Save. A confirmation screen appears, along with a Smart Tip on scheduling the client's first appointment.

Figure 4. Confirmation screen with a Smart Tip on scheduling a first appointment.

TIP

Schedule the first appointment right away so intake paperwork is ready before the client's visit.

5. Documenting a Progress Note

This section walks through documenting a session using the SmartCare™ Smart Walk-Thru. Every note must link to an active treatment goal before it can be signed.

5.1 Step-by-Step Procedure

1. From the client's chart, select the WalkMe Launcher and choose "Walk-Thru: First Progress Note," or select Start Progress Note directly to begin.

Figure 5. Smart Walk-Thru, Step 1 of 3 — starting a progress note.

- 2. Enter the session date and duration as prompted.
- 3. When you reach the Treatment Goal Addressed field, WalkMe highlights it and displays guidance for linking the note to the correct goal.

Figure 6. Smart Walk-Thru, Step 2 of 3 — linking a treatment goal.

CAUTION

A note cannot be signed until it is linked to an active treatment goal. If no goal fits the session, contact your supervisor before documenting.

4. Complete the clinical narrative and the client's response to intervention.
5. Select Sign. A confirmation screen appears, along with a Smart Tip on co-signature requirements.

Figure 7. Confirmation screen with a Smart Tip on co-signature requirements.

TIP

Notes written by associate-licensed staff require a supervisor co-signature. Check the chart status to confirm a note is fully complete.

6. Using the Resource Center

The Resource Center is a self-service panel that gives you on-demand access to guides, FAQs, and support contacts without needing to restart a Walk-Thru from the beginning.

6.1 Opening the Resource Center

1. Select the WalkMe Launcher from any page.
2. Choose Resource Center from the menu.
3. Select any item — such as an FAQ or the Documentation Policy Summary — to open it in place.

Figure 8. Resource Center panel, showing available self-service guidance.

7. Understanding ShoutOuts

ShoutOuts are banner announcements WalkMe displays when there is a time-sensitive update, such as a compliance reminder. They appear automatically when you load an affected page and can be dismissed by selecting the close icon.

Figure 9. A ShoutOut announcing a co-signature compliance reminder on the Dashboard.

NOTE

Dismissing a ShoutOut does not permanently hide it for other users — it will still appear for colleagues who have not yet seen it.

8. Troubleshooting and FAQ

If WalkMe guidance does not behave as expected, review the items below before contacting support.

Question	Answer
The Smart Walk-Thru didn't start when I clicked Launch.	Refresh the page and confirm pop-up blockers are disabled for app.smartcare-streamline.com, then relaunch from the Launcher menu.
I don't see the Launcher icon anywhere.	The Launcher is hidden on some restricted clinical pages. Return to the Dashboard, where it is always visible in the lower-right corner.
Can I exit a Walk-Thru and come back later?	Yes. Select the "X" to exit at any time. Your in-progress intake or note is auto-saved as a draft, and you can relaunch the Walk-Thru from the Resource Center.
A progress note won't let me sign it.	Confirm every required field is complete and the note is linked to an active treatment goal. Notes written by associate-licensed staff also require a supervisor co-signature before they are considered final.
Who do I contact if WalkMe guidance seems out of date?	Use "Contact Clinical Systems Support" in the Resource Center, or email the Clinical Systems Training Team listed on the cover page.

Appendix A: New Hire Onboarding Checklist

Use this checklist during onboarding to confirm a new employee is comfortable with WalkMe-enabled guidance in SmartCare™.

	New Hire WalkMe Onboarding Checklist
☐	Locate the WalkMe Launcher on the Dashboard
☐	Complete the “Completing a New Client Intake” Smart Walk-Thru
☐	Complete the “Documenting a Progress Note” Smart Walk-Thru
☐	Open the Resource Center and review the Documentation Policy Summary
☐	Confirm you understand the co-signature requirement for associate-licensed staff
☐	Bookmark the Clinical Systems Support contact from the Resource Center
